Dear Youth Researchers Academy Participants and Stakeholders,

It is my great pleasure to welcome you to the 2nd Youth Researchers Academy in Harare, Zimbabwe.

Rooted in a firm belief that young people should be involved as partners in the development, implementation, and evaluation of youth-focused research, the YRA offers young people an opportunity to be active partners in conducting ethically and scientifically sound research.

The YRA aims to train and equip young people with the necessary skills needed for them to become leaders in youth-led and youth-focused research. Teaching sessions, conducted during a two-week residential program, will explore all aspects of the research process including forming relevant research questions, planning and conducting data collection, data analysis, and the dissemination of research findings. Following the residential training, the youth researchers will be offered the opportunity to carry out supervised research, working with a dedicated and highly experienced mentor and research team.

Youth researchers, get excited! This is going to be an amazing and worthwhile experience. I truly hope that you make the most of this opportunity to network, socialize, learn and get involved in relevant research work. Please take the time to read through the rest of this handbook so that you are prepared to meaningfully engage in the training sessions. The mentors and I are confident your participation will result in tremendous learnings and demonstrate the importance of programs such as the YRA. Enjoy the experience, and please feel free at any time to give us your feedback. We look forward to supporting you throughout this journey.

Sincerely,

Professor Rashida Ferrand
Acknowledgements

BRTI and LSHTM mentors, trainers, and administrative staff.
Buhlebenkosi Tshabangu-Moyo for conducting the workshop on public speaking and presentation skills.
Ardent Creative for the graphic designs.
Gilbert Mupiwa for the photographs.
INTRODUCTION
TO THE YOUTH RESEARCHERS ACADEMY

What is the YRA?
The Youth Researchers Academy (YRA) is a residential orientation program aimed at training young people on research concepts, methodology and implementation. A key objective of the YRA is not only to train youth researchers on research, but to provide an opportunity to plan and conduct research.

The residential training will focus on skills building, incorporating several activities such as group work, role plays, and games to promote learning through action rather than one-way communication, presentations or lectures. Time will be allocated to discuss issues of concern to participants including value clarification, personal beliefs, judgments, and definition of concepts.

Youth researchers (YRs) will be allocated to one of several proposed research projects and will work with a mentor to design a relevant research question and methodology. Findings will be presented to the entire group at the end of week two. Supervised by their mentors, the YRs will spend 2-3 months implementing their projects. Project results will be disseminated to stakeholders upon completion.
Chido Dziva Chikwari

I am an epidemiologist with a background in Biomedical Science. My main research areas are evaluating the implementation of HIV testing strategies for children and sexual and reproductive health interventions for adolescents and young people. I am passionate about young people, research and Zimbabwe.

Constance Mackworth-Young

I am a social scientist, passionate about adolescent health and qualitative research. I am excited to learn from and work with adolescents.

Constancia Vimbai Mavodza

I am a global and public health practitioner, with experience coordinating, implementing and evaluating public health projects and policies focusing on HIV/AIDS, SRHR, human resources for health, AGYW. As an Afrofeminist, I am particularly interested in the roles that both young African women and men have to play in using evidence to achieve both gender and health equity. The YRA presents an opportunity to explore that angle.
Mandi Tembo

I am a PhD research fellow that is passionate about women's health and rights and empowering young people. My main research areas are menstrual health and SRH for adolescents and young people. I am so excited to be a part of the 2021 YRA!

Mufaro Makuni

I am the group's public engagement coordinator responsible for public engagement activities & communications on multiple studies. I am passionate about empowering youths from different backgrounds in Zimbabwe.

Ethel Dauya

I am a public health specialist with many years of experience in research involving adults, young people and children. I am passionate about mentoring young people interested in research which deals with issues concerning themselves and their peers. I am excited to be part of the 2021 YRA as it gives me another chance to interact and nurture young people as they carry out research which relates to their wellbeing.
Rashida Ferrand

I am a doctor and public health expert. I work with young people and really enjoy learning from and with them.

Rudo Chingono

I am a social scientist, with several years of HIV and public health research experience. I am passionate about maternal mental health related issues. I thrive towards empowering disadvantaged adolescents and young women and I believe the YRA offers a good platform where I can help towards this.

Ruramai Rukuni

I am a doctor and Wellcome Trust Research Training Fellow in Public Health and Tropical Medicine. My PhD is analysing the impact of HIV on skeletal development in children aged 8-16 years. I am excited to be part of the YRA because I will get the chance to work with this age group as colleagues and get their insights and reflections on the work that we have been doing.
Suzanna Francis

I am an epidemiologist with a nursing background. My research focus is on research that makes a real world impact on HIV and STI prevention and control. I have expertise in mixed methods research combining clinical, laboratory, and qualitative methods.

Vicky Simms

I'm an epidemiologist. I do research on problems affecting adolescents including mental health and growing up with HIV. I love being part of the YRA because young people have the best insights.
SUMMARY
OF POTENTIAL RESEARCH STUDIES

Community Youth Neighbourhood Walks (with CHIEDZA process evaluation)

YRs will conduct neighbourhood walks and informal interviews within CHIEDZA communities with young people not coming to CHIEDZA. These would take place at youth gathering places in the community, and include one-to-one and group conversations. The aim would be to understand why some young people choose not to come to CHIEDZA.

The IMpact of Vertical HIV infection on child and Adolescent Skeletal development in Harare, Zimbabwe (IMVASK study) is a three-year research project investigating bone development in 300 children aged 8-16 years who attend Parirenyatwa and Harare Hospital and 300 children from six schools in Mbare, Highfields, Budiriro and Mabvuku. The main aim of this research is to understand how HIV affects bone growth in children during the pubertal period and to also engage young people, their parents, guardians and communities about health and science. We have been conducting bone scans and other musculoskeletal assessments to measure the differences in bone density (the amount of bone mass for a given bone size) between children with and without HIV and to measure how bone grows differently in these two groups over the course of a year. Our findings will determine whether children with HIV will require interventions to enhance bone development to try to avoid premature osteoporosis in adulthood.
Partner Notification (within STICH)

Partner notification is a challenge among people who are treated for STIs. We want to investigate uptake of partner notification slips amongst clients who test NG/CT/TV positive and have come for treatment among CHIEDZA participants for 2 months.

Acceptability of self-collected vaginal swabs (within STICH)

Rapid diagnostic tests are the cutting edge of testing for sexually transmitted infections. Some of these tests require self-collected vaginal swabs. Youth researchers will develop a questionnaire and conduct quantitative interviews to assess the acceptability of self-collected vaginal swabs among young women who agree to testing for trichomoniasis with the OSOM TV rapid diagnostic test.

Youth researchers will have an opportunity to be trained on how to conduct participant observations, facility-based level surveys, and key informant interviews. They will also be given the opportunity to come up with a short study on how typhoid, and typhoid vaccines has impacted the lives of adolescents in 2 of the Harare city clinics. This exercise will allow them to formulate the research topic, tools, and expose them to the experience of conducting data collection linked relevant to young people.
Adolescents living with HIV can have weak bones. VITALITY is a trial to find out whether taking Vitamin D and calcium carbonate for a year will improve bone density. We will enrol 840 adolescents living with HIV, in Harare and Lusaka. Half of them will receive Vitamin D and calcium carbonate, the other half will receive a placebo. We can measure the density of bones using a DXA scanner.

**Process Evaluation of YRA**

YRs will conduct interviews with youth researchers from the previous YRA to understand their experiences of the YRA. This would be part of evaluating the YRA, from the perspective of the youth researcher participants.

**DETAILED LESSON PLANS**

**Week 1**

**Day 1: Overview**

| **Facilitator Name:** Chido Dziva Chikwari | **Session Date:** Day 1 |
| **Session Title:** Objectives and Individual Goals of the YRA | **Session Time:** 09:30-10:00 |

**Key Objectives:**
1. To provide an overview of the YRA
2. Outline the aims of the YRA
3. Highlight individual goals of the YRA for the YRs

**Room Layout:** No seating preference as participants will work individually

**Resources or Materials Required:** Sticky notes and pens for all participants, Audio and Visual material to play video, Short PPT presentation

<table>
<thead>
<tr>
<th>Content</th>
<th>Teaching Methods</th>

| Small group work feedback.                                             | Facilitate each group to share what they discussed                                | - The summariser from each group has 3 minutes to share a summary of their discussion. The facilitator should write up key themes from what is presented on a flipchart.  
- After all groups have shared, facilitate a whole group discussion. In particular commenting on the key themes, reflecting on whether anything is missing, and identifying anything that’s particularly important to highlight. | Flipchart and pens                   | 20 mins  |
| Presentation about global framings of AYP, to include definition of AYP, key challenges and opportunities faced by AYP, why it’s important to work with AYP (for their lives now, future lives and their children’s lives), and importance of including AYP in research and programming about AYP. | Powerpoint presentation by facilitator (CMY to prepare)  
Facilitator circulating around the room.                                   | Listening                                                                            | Powerpoint presentation, projector, projector screen | 20 mins  |
| Group reflection about similarities and differences of YRs own perceptions of AYP, and that in the global literature. | Facilitators to collect each group’s flipcharts at the end (it could be used as a stimulus for a later activity) | - Return to the same groups. Group discussion about the similarities and differences between their own answers and the way that AYP are presented and discussed in global reports and academic literature.  
- Facilitator asks groups to present this how they want on a single flipchart paper (e.g. table, mindmap, diagram, drawing, writing) – ask groups to be creative. | Flipcharts, post-it notes, pens and markers.                                      | 20 mins  |

**Session Date:** Day 1

**Session Title:** Introduction to Research Methods

**Session Time:** 15:00-16:00

**Key Objectives:**
1. To describe what research methods are in the ‘toolbox’
2. To understand the terms ‘quantitative’ and ‘qualitative’
3. To apply appropriate methods to a research question

**Room Layout:**
- U-shaped chair setup with session lead facing the participants

**Resources or Materials Required:**
- Projector for powerpoint
- Flip-board, paper and pens/markers to record important points/issues that came up in the large group discussions
- Post-it notes and pens to vote on the right tools for the research question

**Day 2: Quantitative Research Methods**

**Facilitator Name:** Vicky Simms  
**Session Date:** Day 2

**Session Title:** Quantitative Research Methods  
**Session Time:** 09:00 - 10:30

**Key Objectives:**  
*YRAs are in 4 small groups. Each group is given a research question. Objectives are:*  
1. Plan data collection  
2. Collect reliable, objective and accurate data (with consent, where appropriate)  
3. Identify limitations of the data

**Room Layout:** Small groups. Some groups will go outside to collect data

**Resources or Materials Required:** flip chart paper, hardbacked pads of paper (eg A4 size), pens. Two 30cm rulers. YRAs expected to have calculator function on phones

<table>

| Analysis of data collected in the quantitative data collection session | Small group            | - Calculate simple analyses, e.g. prevalence, minimum and maximum, range.  
                                                                                       |                      |          |
|                                                                         |                        | - All analysis can be carried out on paper, either by hand or with calculator            | Paper, pens, calculators |          |
| Group presentation                                                      | Whole group discussion | Each small group in turn presents its answer to the research question it was given in the previous session. | Flipchart paper      | 40 mins  |
**Facilitator Name:** Chido Dziva Chikwari  
**Session Title:** Session Title: Practical Examples of Quantitative Research Studies  
**Session Date:** Day 2  
**Session Time:** 12:00 - 13:00

### Key Objectives:
1. To state the research question in a published paper
2. To critically evaluate the research tools used in a quantitative research study from a published paper
3. To list the key findings that came from a published quantitative research study
4. To summarise the contribution and impact that the finding made for published health research

### Room Layout:
In groups of 4-6 YRs each

### Resources or Materials Required:
- In-person facilitator to support group discussions
- Markers/Highlighters
- Printed abstracts from published papers for each small group
- Flipchart and pens

### Content

| Small group work with the youth researchers | Small group discussion                  | In small groups of 3 YRs, discuss the following:  
- What is the research question(s)?  
- What is the research design and tools used? Were these appropriate?  
- What are the key findings that came out of the study  
- How do these findings contribute to answering the research question?  
One person from each group should take notes on the flip chart paper. Another should present to the whole group. | Copies of published papers  
Flip chart paper and pens for each group  
Highlighters for each group | 30 mins   |
| Feedback of results to the whole group | Large group discussions and informal presentations of the findings from the small group work | One person per group presents the results of the small group work | Tape to hang up flip chart papers | 20 mins   |
| Wrap up                                | Lecture style                           | Take notes                                                     | Powerpoint                                          | 5 mins   |
# Day 2: Quantitative Research Methods

**Facilitator Name:** Ethel Dauya

**Session Date:** Day 2

**Session Title:** Research Ethics

**Session Time:** 14:00 - 15:00

**Key Objectives:**
1. Understand Ethics in Research

**Room Layout:** Teamwork, all seated in a semi-circle

**Resources or Materials Required:** Flip board and chart

<table>
<thead>
<tr>
<th>Content</th>

| What is ethics in research? | - Discussion  
- Questions and answers | - Respond to questions  
- Write on flip board | Flip board, paper and marker | 30 mins |
| Making sure that the research being done is ethical! | - Discussion  
- Questions and answers | - Respond to questions  
- Write on flip board | Flip board, paper and marker | 30 mins |
**Facilitator Name:** Mandi Tembo  
**Date:** Day 2

**Session Title:** Informed Consent and Confidentiality  
**Time:** 15:00 - 16:00

### Key Objectives:
1. To ensure understanding of terminology – What is “Consent” and “Confidentiality”?
2. Outlining the concept and importance of “Informed Consent and Confidentiality”
3. To implement learned concepts and practices – Outlining What is Involved in Attaining Informed Consent and Ensuring Confidentiality
4. To assess complete understanding – Short Interactive Quiz and Question and Answer Session

### Room Layout:
- U-shaped chair set-up with session lead facing the participants
- Flipboard for activities and PowerPoint set-up for presentation
- Sticky Notes and markers

### Content | Teaching Methods | Youth Researcher Activity | Resources | Duration
---|---|---|---|---
- Ensure understanding of terminology  
- Outlining the Meaning and Importance of “Informed Consent and Confidentiality” | Short PowerPoint presentation | Take notes | PowerPoint | 20 mins
- Outlining what is Involved in attaining informed consent and ensuring confidentiality | Read through of informed consent and confidentiality documents | Read through as a group and ask questions when necessary | Printed example | 10 mins

# Day 3: Qualitative Research Methods

**Facilitator Name:** Rudo Chingono  
**Session Date:** Day 3

**Session Title:** Qualitative Research Methods  
**Session Time:** 09:30 - 10:30

**Key Objectives:**
1. Introduce qualitative research and key attributes
2. Research methods – individual interviews, focus group discussions and observations
3. Tool Design – understanding research question formulation
4. The art of qualitative data collection – effective questioning
5. Data Capturing – note taking, contact summaries, audio recording

**Room Layout:**
- U-shaped chair set up
- Enough space and appropriate set up to split to smaller groups and allow for role plays

**Resources or Materials Required:** Projector, presentation, speaker, white board/flip chart, markers, interview guides, observation guide, pens and notebooks

<table>

**Facilitator Name:** Constance Mackworth-Young with assistance from Mandi Tembo

**Session Title:** Qualitative data analysis

**Session Date:** Day 3

**Session Time:** 11:00 - 12:00

**Key Objectives:**
1. Understand the purpose of qualitative data analysis
2. Understand different ways of analysing qualitative data
3. Work through one guided example of analysis of a section of an interview transcript

**Room Layout:** Around tables of 6 (so they can be split into groups of 3 later). All YRs should be able to see the projected zoom.

**Resources or Materials Required:**
- Zoom link to CMY on projector, and (ideally) webcam so CMY can see the room.
- In-person facilitator to support group discussions
- Flipchart and pens
- Printed interview transcripts for each YR

<table>

### Day 4: Community Engagement, Advocacy and Dissemination

**Facilitator Name:** Mufaro Makuni  
**Session Date:** Day 4

**Session Title:** Public Engagement in Youth Research  
**Session Time:** 09:30 – 10:30

**Key Objectives:** The main objective is get our youth researchers thinking about how they will engage audiences with their research in the community. What methods, mediums and platforms they can use to do so.

**Room Layout:** Outside group work & indoor presentation set up.

**Resources or Materials Required:** Flip chart paper, pens and markers, flip chart

<table>

| Defining Public Engagement:  
In this exercise, YRs will give one word answers & responses on what they think of when see the following key words:  
- Public Engagement  
- Ways to engage the public  
- How to plan your public engagement  
This session will coincide with a supporting slide deck. | - Open floor question and response session: Where we will take note of the YRs’ responses  
- A YR will scribe answers | Marker and flipchart | 10 mins |
| Public Engagement Group Exercise: YRs will go out into their designated groups with mentors to develop a pitch on a public engagement campaign or exercise to get audiences on board on what their research is and what it intends to achieve etc. | Teamwork & creativity | Working in groups to develop a public engagement activity/campaign | 30 mins |
| Public Engagement Campaign/Activity Pitching exercise: YRs select a group representative who deliver a short pitch of their idea in front of a judge | YRs acquire some public speaking skills & overall teamwork | Public speaking | 15 mins |
| Reflection & final thoughts: YRs evaluate themselves and feedback on what they learnt, give prize for the best pitch | - Open floor question and response session: Where we will take note of the YRs’ responses  
- A YR will scribe answers | | 5 mins |

<td><strong>Session Time:</strong> 11:00 - 12:00</td>
</tr>
</tbody>
</table>

**Key Objectives:**
To address the following three questions:
1. What is public engagement?
2. Why is engaging communities and participants important?
3. What sort of engagement activities have we carried out in our research group?

**Room Layout:**
- Facilitator table at the front of the room with projector and flip chart.
- 2 small tablets at the front for demonstration.
- Small tables to accommodate groups of 4-5.

**Resources or Materials Required:**
Laptop, projector, speakers, flip chart paper, pens and markers, flip chart, post-it paper, sticky notes, paper
<table>

| **What is public engagement (PE)?**
Definition of PE
Purpose of PE
Types of PE activities
Evaluating PE activities
Demonstration of PE activity | Presentation
Demonstration | - Youth researches will listen to a presentation outlining definitions and types of PE.
- A subset of volunteers will be asked to take part in a table-top PE activity demonstrated by the facilitator. | Laptop, projector
Flipchart, marker pens
Table-top game | 15 mins |
| **Why is engaging communities and participants important?** | Group participation | - Youth researches will be asked to write on sticky notes reasons why they think engaging communities is important as a group. They will be asked to come and stick them up in turn on the flipchart at the front. | Flipchart
post-it paper
sticky notes | 7 mins |
| **What sort of engagement activities have we carried out in our research group?**
Examples:
Chiedza’s Song
IMVASK
Planned future PE activities | Presentation | - This presentation will outline the different types of PE activities carried out by the research group and plans for future activities. | Laptop, projector | 15 mins |
| **Competition: design a PE activity** | Group participation | - Youth researchers will be given a study brief and asked to design a PE activity as a group and submit at end of session – prize to be announced and presented the following day. | Paper, pens | 15 mins |
| **Session summary and close** | Presentation/group presentation | - A brief presentation will summarise key points and youth researchers will have the opportunity to ask questions. | Laptop, projector | 6 mins |
**Facilitator Name:** Constancia Mavodza  
**Session Date:** Day 4

**Session Title:** Research and Advocacy  
**Session Time:** 14:00 - 15:00

### Key Objectives:

1. The session will be an introduction to research (evidence); advocacy and policy-making.
2. It will be a combination of small and big groups; and YR will be asked to engage with the research material they have absorbed in Day 1-3; and use that to intersect with policy and advocacy.
3. They will use learning to debate on researchers vs. advocates and the pros and cons of both.

### Room Layout:

Can be done in a large room or outside. YRs to work in groups of 3-5 with support from facilitator or mentor if they have any questions.

### Resources or Materials Required:

Flip chart paper, pens and markers, flip chart

| Review of proposed YRA projects              | PowerPoint presentation & group discussion | - Take notes  
- Contribute to the conversation and engage with PowerPoint presentation | Projector and laptop       | 15 mins  |
| Outlining key skills needed for each project | Big group discussion              | - Participants to discuss in small groups what skills may be needed for each project  
- Participants to use post-it notes to write out needed skills and post under relevant project  
- Large group discussion of work completed | -flip chart paper,  
- markers/pens                     | 35 mins  |
| Facilitating brainstorming session that will guide project selection | Individual work                   | - Participants to reflect and select project of interest   |                            | 10 mins  |
**Facilitator Name:** Constance Mackworth-Young and Constancia Mavodza  
**Session Date:** Day 5

**Session Title:** Week 1 Evaluation  
**Session Time:** 14:00 - 16:00

**Key Objectives:**
1. For students to evaluate their own performance and learning, in order to reinforce their learning and improve the impact of the course.
2. Provide an opportunity for students to demonstrate their learning so far.
3. To evaluate the perceived effectiveness of the course, in order to improve the course.

**Room Layout:**
- Tables with around 4 youth researchers on each.
- Resources or Materials Required: Flipchart paper, pens, post-its, notebooks (I assume YRs will have one already), print out of personal feedback questions for each YR. Zoom link on projector, and (ideally) webcam.

**Content**  
**Teaching Methods**  
**Youth Researcher Activity**  
**Resources**  
**Duration**

| Youth researcher reflection | Facilitator lead youth researchers through self-reflective task | - Each youth researcher writes down their own answers to the following questions (in a notebook or journal):
  i) What have I learnt?
  ii) Why is that important to me?
  iii) How will I use that in the future?

- Before they start, the facilitator frames this reflection in the context of where we are in the course – end of week 1, week 2 coming next.

- Facilitator asks 2-3 youth researchers to share with the group if they feel comfortable. | Notebooks (if YRs don’t already have one), and pens for each YR. | 20 mins |

<p>| Preparation and design of research proposal | Small group activity (approximately 4 YRs) | - Each group is given a research question (framed loosely) and asked to come up with a brief presentation for a research proposal. | Flipchart paper and pens. | 45 mins |</p>
<table>
<thead>
<tr>
<th>Content</th>
<th>Teaching Methods</th>
<th>Youth Researcher Activity</th>
<th>Resources</th>
<th>Duration</th>
</tr>
</thead>
</table>
| Presentation of research proposal                     | Presentations by small groups to whole group | - They will be told that the outcome will be a 3 minute presentation of their research proposal to the whole group (and asked to select one presenter, and one person who writes down the research proposal on flipchart paper).  
- The aim is to put into practice the ideas and skills they have learnt this week and to prepare them for the thinking and work they will do in week 2.  
- Their research proposal should include:  
  i) Rationale for the study  
  ii) Ethics  
  iii) Methods  
  iv) Analysis  
  v) Dissemination  
Each group is given 3 minutes to present their research proposals to the rest of the cohort. | Facilitator will collect in the flipchart paper at the end. | 25 mins |
| Facilitated group discussion about what YRs have learnt on the course so far | Whole group discussion together | - Facilitator facilitates a discussion about what the YRs feel they have learnt from week 1 so far.  
- Include what they learnt, what they enjoyed, what they would improve, what they found difficult, and what gaps they think they still have in their knowledge.  
- Use the research proposal presentations as a stimulus for this discussion. | N/a | 20 mins |
| Feedback on week 1 writing personal feedback          | Writing personal feedback              | Each YR writes feedback on:  
- What have you learnt?  
- What do you feel you still need to know?  
- What have you enjoyed?  
- What have you found difficult/ not enjoyed?  
This feedback is anonymous. | Give each YR a print out with the questions on them and space to write. Collect these in at the end of the session. | 10 mins |
## Day 2: Writing Skills Workshop

**Facilitator Name:** Rashida Ferrand and Chido Dziva Chikwari

**Session Date:** Day 2

**Session Title:** Writing Skills Workshop

**Session Time:** 14:00 - 16:30

### Key Objectives:
1. Why are writing skills important?
2. Strengthen English writing skills

### Room Layout:
Sitting in U-shape with desk, paper and pen

### Resources or Materials Required:
Flip charts, post-it notes, pens and markers

### Content

<table>

</tbody>
</table>
### Teaching Methods

Facilitate individual work on this example as a whole group.

**Facilitator to explain:**
- What a topic sentence is and how it should be structured
- What a summary is and how it should be structured

Allow participants to work through exercise individually and help where needed.

Allow a few to share (3-5) and facilitate discussion on presentations made.

### Youth Researcher Activity

At the beginning of the session, read through example as a whole group.

- Topic sentence
- Summary (100 words)

### Resources

- Flipchart and pens

### Duration
